RE: Monitor Well Closure Request, South Woodstock Store, SMS #1990-0522

Dear Mr. Noble:

The Sites Management Section (SMS) has reviewed the July 8, 2010 report titled, "*Site Investigation, South Woodstock Country Store*" prepared by Harper Environmental Associates (HEA) for additional site investigation conducted at the above site on June 16. The SMS has also reviewed information contained in the site file. Based on these reviews no further monitoring or site remediation is required with respect to the leaking gasoline dispenser reported in 2006.

The SMS can assign this site a Site Management Activity Completed designation after the monitor wells installed for the investigation have been properly closed. If you wish to continue to use these monitor wells, a well maintenance plan must be submitted to and approved by the SMS. Requirements for well closure or a well maintenance plan are enclosed.

Following receipt of the monitor well closure letter or approved monitor well maintenance plan, the SMS will issue the site closure letter. Please feel free to contact me if I can be of assistance.

Sincerely,

A handwritten signature in dark ink that reads "Gerold Noyes".

Gerold Noyes, P.E.
Environmental Engineer
Sites Management Section

CC: Cliff Harper, HEA (via electronic mail)
